A detailed view of a classical-style kitchen. The central feature is a large island with a thick, light-colored marble countertop. The island's base is white with ornate, carved details and a central panel featuring a decorative scrollwork design. To the right, a tall, fluted white column with a classical capital stands prominently. The background shows a kitchen area with built-in ovens and a wall with decorative panels and columns. The ceiling is a complex, multi-tiered coffered structure with recessed lighting. The overall aesthetic is one of elegance and timeless design.

# INDUCTION HOB

When using any of Tigers induction chafers and combining them with Tigers Induction heaters you will accomplish many good things: going green, use less energy, run more chafers on a single power circuit, possibly eliminate the need to re-wire the building. Induction heaters require induction ready pans and chafers.

## MELAMINE

100% melamine has better temperature retention than ceramics and tempered glass and can withstand food and drink temperatures from  $-20^{\circ}\text{C}$  to  $120^{\circ}\text{C}$  ( $-4^{\circ}\text{F}$  to  $248^{\circ}\text{F}$ ). Melamine is a great insulator and remains cool to the touch, even when hot food is dished into it.
