TOUGH TROLLEYS.

The perfect mobile assistants made of stainless steel.

They can certainly take a lot.

In the food service industry, hotels and the catering industry, things can get hectic during rush hours: day in, day out, huge numbers of dishes need to be transported. As quickly as possible.

Ready for anything – the serving and transport trolleys by BLANCO Professional. With an extra sturdy design and high-quality processing, they transport everything that is loaded onto them – light and easy to manoeuvre, regardless of how far it needs to go.

The perfect size for all: the serving and clearing trolleys for transport, temporary storage and stocking. Also available for larger capacities in the XXL version with additional shelves.

IN THE FAST LANE.

Quick delivery – long service life. With these transport trolleys, **BLANCO Professional** lives up to its name.

Made of high-quality stainless steel, the serving and clearing trolleys are a long-term investment. The tried-and-tested high standard of production and carefully selected materials make them assistants with real resilience, wherever a high number of meals are served every day.

They bring comfort back to work: with a range of practical details, various castor models and useful accessories. And even in narrow, unstable or uphill locations, nothing can fall off – the large, deep-drawn profile edge is there to keep everything in place. Safe and sound.

And because no one wants to wait long on such products, **BLANCO Professional** offers a **rapid delivery service**: instead of ordering in large quantities and having to endure long waiting times, the most common serving and clearing trolleys are available from stock. And ready for use straight away.

Firmly connected.

Perfectly welded seams in one piece connect and stabilise tube frames and shelves. This ensures a good hold. Forever.

Sturdy and safe.

Curled edges and a large, deep-drawn profile edge not only make the shelves super sturdy and resilient, but also provide protection against cuts and scratches at work.

Broken glass doesn't have a chance.

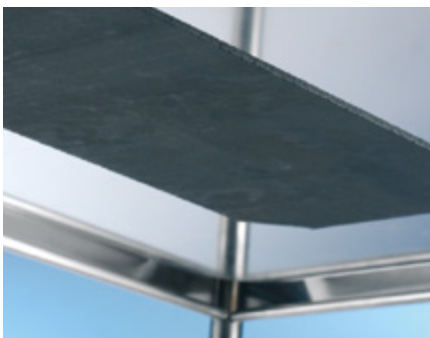

And even if things get a little rough underfoot or a sharp corner awaits, the all-round, raised profile edge on every shelf makes sure nothing falls off.

Storage and transport for Gastronorm lids with seal.

The **GDD top-mounted frame** by BLANCO Professional is the ideal solution for the correct storage, drying, transport and dispensing of Gastronorm lids with form-fitting seal. Through its special geometry, it fits perfectly on 10 x 6 serving trolley shelves. It can hold up to 30 GN 1/1 Gastronorm lids or a large variety of smaller lids.

To go with the top-mounted frame, the **SW 10 x 6-3 BASIC GDD serving trolley** is available. Thanks to the larger distance between shelves, every shelf can accommodate a GDD top-mounted frame. The serving trolley therefore offers optimal mobile storage for large volumes.

Smooth running at its best.

Under every shelf, a noise-insulating antidrumming mat acts like a noise damper. Annoying rolling noises are therefore significantly reduced.

Bump-resistant.

As standard: the rugged bumper rail in a new design. Protects trolley and its stock against scratches and scrapes.

Extra tough.

For extremely heavy loads, additional reinforcing profiles and gusset plates are available on request.

The opened doors
can be securely locked
and are well-protected
by the bumper rail.

Three-sided
panelling with
two easy-to-mount
hinged doors.

NICE VIEW.

Privacy shield and attractive panelling in one. Quick as a flash.

The new panelling for BLANCO serving trolleys hides everything that no one needs to see. As well as protecting everything that needs to stay clean: used or clean dishes simply disappear behind closed doors.

The sturdy side walls are easy to hook in: simply clip in behind the edge of the upper shelf and fasten on the lower shelf – done. The sturdy side walls can be hooked in and unhooked easily. This facilitates cleaning and the trolley can also be used without panelling if necessary.

The three-sided panelling is available with or without hinged doors. When open, the doors can be locked within the bumper rail – this makes manoeuvring easy and prevents damage.

In addition to stainless steel, the panelling is available in thirteen different colours, all of which make the serving trolley a real eye-catcher in any surroundings.

The side walls
Simple to hook in and just as easy to remove.
