Physical Vapour Deposition

PVD is a technique which gives objects valuable colors and shades by evaporating metal particles in a vacuum chamber. This special treatment is welded at an atomic level to the surface of the stainless steel cutlery, hardening the steel and optimizing its resistance to both rubbing and corrosion, as well as preventing rust and oxides from forming.

Il PVD è un processo che conferisce agli oggetti pregiate colorazioni e sfumature, ed è ottenuto dalla deposizione di particelle metalliche mediante vaporizzazione in una camera sottovuoto. Questo particolare rivestimento si salda a livello atomico al substrato in acciaio inox delle posate, dotando il materiale di maggiore durezza e di resistenza sia all'usura per sfregamento che alla corrosione, inibendo la formazione di ruggini o ossidi.

Vintage

A special craftsman finishing technique on the surface of the stainless steel cutlery. Through a series of industrial scraping processes, surfaces assume an original and intentionally "worn out" effect, introducing a new and fascinating ambience at the table and a new trend for contemporary interior design.

Una particolare lavorazione meccanica di finitura di massa del substrato delle posate in acciaio inox. Mediante una serie di processi industriali di natura abrasiva le superfici assumono una inedita resa, un effetto volutamente "usurato", che introduce un nuovo ed affascinante gusto in tavola e di tendenza per l'interior design contemporaneo.

Antique

The particular "Antique" finishing is characterized by the pleasant to touch texture and the original matt appearance of the stainless steel. This finishing is the result of a high pressure ceramics sandblasting treatment, made up of micro ceramic particles, which defines the final effect of the surfaces.

Il particolarissimo effetto "Antique" si caratterizza per una sottile texture piacevole al tatto e, nel contempo, per l'inedita resa opaca che assume l'acciaio. La finitura è il risultato di un trattamento di sabbatura ad alta pressione mediante microparticelle in ceramica, che definisce l'effetto finale delle superfici.

Vintage PVD & Antique PVD

Texture and color can be combined with each other, in order to establish a personal style on the tabletop. In this case, the processes take place in consecutive phases, from the different abrasive techniques to the coloring ones. Combining these two treatments, cutlery assumes original effects.

Texture e colore possono essere combinate tra loro, per ricercare anche in tavola il proprio stile. In questi casi i processi si articolano in più fasi produttive che si susseguono partendo dalla lavorazione con le differenti tecniche abrasive dello strato superficiale per poi passare alla sua colorazione. Il mix tra queste due lavorazioni dona così inediti effetti alle collezioni.

Special finishing on demand.

Finiture speciali su richiesta.

KEY LEGENDA

The cutlery shapes are only representatives.
All knives have serrated blade.

Le sagome delle posate sono puramente indicative.
Tutti i coltelli hanno la lama seghettata.
