Double Point®

OUATE DOUBLE POINT

Les serviettes Double Point sont fabriquées à partir du collage de deux couches de papier, grâce à une technique spéciale de gaufrage qui leur confère un meilleur volume et plus de douceur. Leur texture et leur apparence agréables en font un produit incontournable pour l'art de la table. Elaborées sous différents formats et couleurs (disponibles en blanc, en couleurs, dans la gamme blanche décorée ou en matériau recyclé).

TISSUE DOUBLE POINT

I tovaglioli Double Point sono fabbricati a partire dalla sovrapposizione di due strati di carta tissue mediante una tecnica speciale di goffratura che le conferisce un maggior volume e morbidezza. Il loro aspetto e la loro trama delicata ne fanno un elemento imprescindibile per una bella presentazione. Elaborati in diversi formati, si possono acquistare in bianco, a colori, nella gamma bianca decorata o in materiale riciclato.

TISSUE DOUBLE POINT

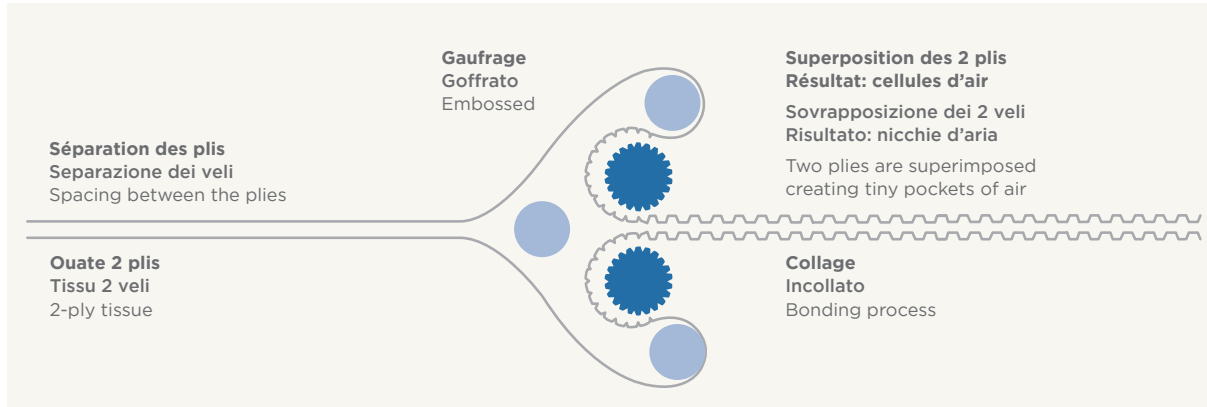

Double Point napkins are made by bonding two plies of tissue paper by means of a special embossing technique, which makes them softer and thicker. Their pleasant texture and appearance makes them a must for any dinner table. Available in different formats, they come in white, an assortment of colours, the decorated white range or in recycled material.

DRY COTTON®

Le motif Dry Cotton est imprimé sur une face avec une texture raffinée qui rappelle la délicatesse des tissus. Cette impression nous permet d'offrir un produit plus économique et plus écologique, tout en conservant les qualités essentielles de l'Airlaid : douceur, résistance exceptionnelle et capacité d'absorption élevée.

Il disegno Dry Cotton è stampato su un lato con una texture raffinata che evoca la delicatezza dei tessuti. Questa stampa ci permette di offrire un prodotto più economico ed ecologico, pur mantenendo le qualità essenziali di Airlaid: morbidezza al tatto, eccezionale resistenza e elevata capacità di assorbimento.

The Dry Cotton design is printed on one side with a refined texture giving the feeling of a textile fabric. This impression allows us to offer a product that is more economical and ecological and at the same time maintaining the essential qualities of Airlaid: Soft touch, exceptional strength resistance and high capacity of absorption.

Rince-doigts flushables

94 % des lingettes disponibles sur le marché ne sont pas flushables (ne se délitent pas dans l'eau), car elles sont fabriquées à partir de fibres plastiques. C'est pourquoi, en aucun cas, elles ne peuvent être jetées dans les toilettes. Les 6 % restants, bien qu'elles puissent être flushables, contiennent des liants chimiques. Nos lingettes, en plus d'être jetables dans les toilettes (flushables), sont 100 % naturelles et biodégradables, car elles sont fabriquées à partir de papier, une matière première naturelle, renouvelable et certifiée PEFC (Programme for the Endorsement of Forest Certification), sans liants chimiques. Elles offrent également une résistance optimale à l'humidité, une grande capacité d'absorption et une décomposition rapide.

Salviettine flushables

Il 94% delle salviette in commercio non sono flushables perché sono fatte di fibre di plastica, quindi non possono in nessun caso essere gettate nel wc. Il restante 6%, pur essendo flushables, contiene un qualche tipo di legante chimico. Le nostre salviette oltre ad essere flushables, sono anche naturali al 100% e biodegradabili, realizzate con carta, una materia prima naturale, rinnovabile e con certificazione forestale PEFC e senza leganti chimici. Allo stesso tempo, offrono un'ottima resistenza all'umidità, elevata capacità di assorbimento e rapida decomposizione.

Flushable wipes

94% of wipes on the market are not flushable as they are made of plastic fibres so, under no circumstances should they be flushed down the toilet. The remaining 6%, although flushable, contain some kind of chemical binder. Our wipes are FLUSHABLE. They are also 100% natural and biodegradable. Made from paper, a natural raw material, renewable and with PEFC forestry certification and no chemical binders. At the same time they provide optimum wet strength, high absorbency resistance and fast disintegration.
